ADP Workforce Now and Cornerstone Core Data Connector

Update Cornerstone employee records in Cornerstone from ADP Workforce Now. This integration allows for all user data to be centralized in ADP Workforce Now and eliminates the need for duplicate data entry.

Your most valuable assets are your people and now, more than ever, strategic talent management is a business imperative.

That's why ADP and Cornerstone OnDemand are partnering to provide clients with comprehensive solutions that will help meet their business needs. ADP's best in class business outsourcing solutions include Payroll, HR, Benefits, and Time and with Cornerstone, clients can choose from the best of breed talent management solutions.

ADP and Cornerstone have collaborated to deliver Single Sign On and a secure data integration, between ADP's Human Capital Management solutions and the Cornerstone platform. By integrating key functional areas of employee recruiting, onboarding, development, performance, compensation, succession and collaboration into one easy-to-use system, companies can improve the ability to maintain consistent employee data across the organization.

Less Complexity, More Configurability

We understand that a "one-size-fits-all" mentality to talent management simply doesn't work. That's why Cornerstone is entirely configurable to meet the specific needs of your organization's talent strategy and your specific business processes and workflows.

Built for the Modern Workforce

With a modern user interface, we strive to create a destination where employees can work smarter and access all of their talent information. Whether employees experience Cornerstone on the web or via mobile devices, our technology is impactful and easy-to-use.
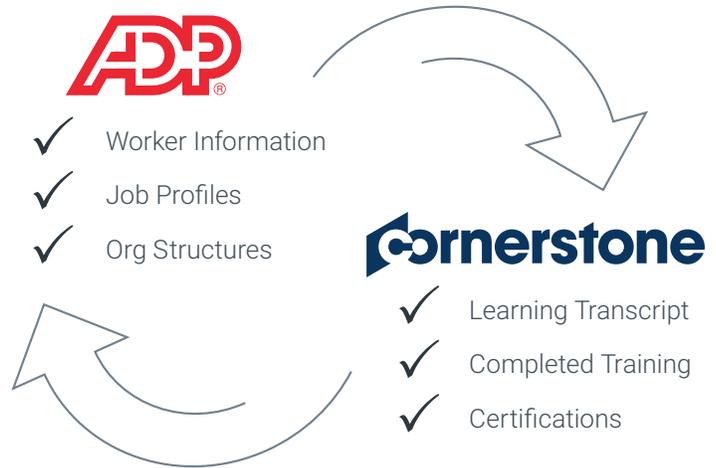

Realize the Benefits of the Cloud

The marketplace for talent management technology is a complicated one – but we are working to make it simple. Rather than asking you to deal with costly upgrades, complex hybrid models or a messy patchwork of integrations, Cornerstone is a single cloud-based unified system.
